

Adventure Maps

SYMBOLS ON MAPS

Guidelines of our adventure maps

Our adventure maps are intentionally designed for children and adults who enjoy decoding messages.

You may need to have some knowledge of basic computer and programming language.

For children, you can assist and encourage them to decode easy maps by choosing maps, easy, either text only or with QR

code with coordinates that are hidden on the maps.

For people who are familiar with binary number, you can choose the maps with binary codes.

Adventure maps are indoor and outdoor activities. Have fun!

Spices Bowl

Decipher the maps

Our adventure maps consist of our logos and QR code.

Spices Bowl

Choosing the map that indicates QR code. Maps with QR code can be either the name of place, street name or the coordinates that help you to find the location of the destination on the map.

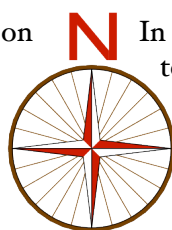

Enjoy the hunt!
Spicesbowl team

FOLLOW THE NORTH STAR

Most adventure maps are drawings, based on direction to north. Some maps are not set to north or it could be different due to composition setting on the map.

Each map gives you hints and texts that help you to find the destination on the map.

DECIPHER THE TEXT

In order to understand the text, you can use text translation on the internet, once you deciphered codes to English text.

Some maps provide enough information such as coordinates and clue images even though it would be more fun to decipher it.
